

Lepelle-Nkumpi Municipality Back on its Feet Again!!!!

Lepelle-Nkumpi Municipality has embarked on the Water Meter Maintenance Project with the main purpose of Cost Recovery .The project has started in the beginning of November 2006,when the new Municipal Manager, Sepitile Mphahlele reports to the municipality.

The project entails repairing and maintaining of disfunctional water meters,including the installation of new meters on areas where there were no meters at all.

Areas which have already been covered are Unit P,R and B and the Project Team is currently busy at Unit F.

The aims of this project are as follows :-

- control of water loss.
- monitoring of illegal meter connections.
- water conservation.
- sustainability of water provision in the area

As the municipality has intensions of bettering water services,it also urges the community to be co operative and work hand in glove with it by taking care of the municipal properties which are in their yards and also pay for their services regularly for this will contribute to an improved sustainable service delivery .

The municipality furthermore appeals to the residents to report those who vandalize water meters, other municipal properties,and also those who make illegal connections.
