In order to achieve this; a series of cells shall be constructed using incoming or stockpiled soil or builder's rubble for cell walls. At the end of

each operating day, the cells are to be enclosed with cover material. The size and number of cells shall be adequate for the volume of waste to be received during the operating day and to accommodate the operation of waste reclaimers. The carcass must be covered immediately by disposing the next load of waste onto the carcasses, allowing for a minimum of 0,75m of waste and cover material. The contractor shall pay special attention to ensuring that the whole carcass is covered, with no protrusions of feet/hooves, tails, heads/horns etc. Notwithstanding the above, stricter regulations may be enforced by the Health Department of the Metro. Carcasses may be disposed of in the landfill together with ordinary refuse if the Employer so directs. Carcasses disposed of shall be completely covered with a layer of unslaked lime, and then covered immediately with soil. To prevent from being exposed by scavengers, the cover must be a minimum of 2000mm thick. The whole carcass must in every instance be covered.

15.8. Spoilt foodstuff

15.8.1. Spoilt foodstuffs of condemned products may be disposed of on the landfill by the method of Safe Disposal. The foodstuff must be disposed of at the toe of the working face where after it must immediately be destroyed beneath the compactor and covered by disposing the next load of waste onto the foodstuff, allowing for a minimum of 0,75m of waste and cover material. Extreme care should be taken that none of these foods are salvaged by any of the vehicle drivers or operating staff. Notwithstanding the above, stricter regulations may be enforced by regulatory authorities concerned.

The purpose of this will be to prevent storm water run-off from entering the working area and for the draining uncontaminated water away from the landfill. The object of the drainage system is to divert run-off round one or both sides of the waste body and into the natural watercourse.

16.2.2. The continued extension and maintenance of this system is required throughout the operation. For this purpose the cover surface of the completed landfill is to be graded and kept clean and free from any obstruction to ensure that rainwater will be kept clear of exposed waste. The Contractor is to ensure that his staff is made aware of the risks of working on a landfill site, and that precautions are taken when working in confined areas such as drains and manholes, and that no smoking be allowed where methane may occur. Methane generation should be monitored at the boundaries of the site and at buildings and manholes, especially the leachate sump. Should high concentrations be detected, measures must be taken, as directed by the Employer

26.7.2. of complying with any instruction which the Executive Manager may issue to the Contractor in connection therewith

26.7.3. of any proper and reasonable measures approved by the Executive Manager which the contractor may take in the absence of specific instructions from the Executive Manager,

26.7.4. as a result of such conditions or obstructions being encountered.

27. CERTIFICATES AND PAYMENT

27.1. Monthly payments

27.1.1. The contractor shall be paid monthly on the amount due to him/her in respect of the actual quantities of waste handled by the contractor. The contractor's invoice is to be accompanied by the following documents:

27.1.1.2. Monthly operational report

27.1.1.3. Proof of work for provisional services (IF ANY)

27.2. Time of payment

27.2.1. The contractor's invoices shall cover the inclusive period of one calendar month (i.e. from the 1st day of the month to the last day of the same month). Such invoices with the accompanied reports are to be submitted to the employer for certification within 7 (seven) days. Payment shall be made by the employer within 30 (thirty) days after such certificate has been delivered.

27.3.2. Expenditure in connection with provisional sums shall be solely at the discretion and direction of the Executive Manager. Any amount not expended shall be deducted from the contract price.

28. REMEDIES AND POWERS

28.1. Penalties

28.1.1. If, at any stage during the contract period or extensions thereto, the contractor shall fail to operate and maintain the site in the manner described in the contract and in accordance to the Department of Water Affairs and Forestry's (DWAF's) "Minimum Requirements for Waste Disposal by Landfill, 1998", then the contractor shall pay to the employer a penalty or penalties for each occurrence or event that such requirements are not met. The Executive Manager shall be entitled to apply the penalty or penalties in terms of this Clause. The events or requirements for which penalties shall be applied, and the corresponding amounts of the penalties, are described in the specification.

28.1.2. The employer may, without prejudice to any other method of recovery, deduct the amount of the penalty or penalties from the contractor's monthly payment. 28.2. Termination by employer

28.2.1. If the estate of the contractor shall be sequestrated, whether provisionally or finally, or if the contractor shall publish a notice of surrender or present a petition for the acceptance of the surrender of his/her estate as insolvent or shall make an arrangement with or assignment in favour of his/her creditors or shall agree to carry out the contract under a committee of inspection of his/her creditors or (being a company) shall go into liquidation, whether provisionally or finally (other than a voluntary liquidation for the purposes of amalgamation or reconstruction) or if the contractor shall assign the contract without the consent in writing of the employer first obtained or shall have an execution levied on his/her goods or if the Executive Manager shall certify in writing to the employer that in his/her opinion the contractor:

28.2.7. has assigned the contract or any part thereof without the consent in writing of the employer,

28.2.8. then the employer may, after giving seven days' notice in writing to the contractor, enter upon the site and expel the contractor there from without thereby voiding the contract or releasing the contractor from any of his/her obligations or liabilities under the contract or affecting the rights and powers conferred on the employer or the Executive Manager by the contract and may arrange with the surety to or may himself continue with the operation or may employ any other contractor or persons to continue with the operation for the remaining duration of the contract period. The employer or such other contractor or persons may use for such completion so much of the plant on site which has been deemed to become the property of the employer hereof as he/she or they may think proper and the employer may at any time sell any of the said plant and apply the proceeds of sale in or towards the satisfaction of any sums due or which may become due to him/her from the contractor under the contract.

28.3. Payment after termination

28.3.1. If the employer shall enter and expel the contractor under Clause 41, he/she shall not be liable to pay to the contractor any money on account of the contract until the costs of penalty (if any) and all other expenses incurred by the employer have been ascertained and the amount thereof certified by the Executive Manager.

28.3.2. The contractor shall be entitled to receive only such sum or sums (if any) as the Executive Manager may certify as due to him/her after deducting the said amount. But if such amount shall exceed the sum, which would have been payable to the contractor, then the contractor shall upon demand pay to the employer the amount of such excess and it shall be deemed a debt due by the contractor to the employer and shall be recoverable accordingly. CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a take all reasonable steps to prevent such abuse;
 - b reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
