

LEPELLE-NKUMPI LOCAL MUNICIPALITY BENEFIT FROM ROAD AGENCY LIMPOPO (RAL) - MUNICIPAL ROAD REHABILITATION PROGRAMME

Lepelle-Nkumpi Local Municipality has signed a Memorandum of Agreement (MoA) with the Limpopo Roads Agency (RAL) as part of the municipal intervention programme based on the District Development Model (DDM).

The MoA is designed to bridge the gap in construction, engineering, and expertise needed to rehabilitate damaged streets and roads in both towns and residential areas.

Commencement of routine road maintenance projects on a 10 km stretch of road in Lebowakgomo Zone A, B, S, and Mathibela will improve travel conditions for motorists. Residents and businesses will benefit from improved road conditions, resulting in safer and more efficient commutes.

As part of the project scope of work, pothole patches will be filled, roads will be cleaned, asphalt will be overlaid, speed bumps will be erected, storm water facilities will be cleaned, and road markings will be applied.

The project will benefit the local community by creating job opportunities for the unemployed in various wards through the adoption of Expanded Public Works Programme (EPWP) guidelines.

Routine road maintenance is an important investment in the infrastructure of the community. It will not only enhance road safety and driving experience but will also contribute to the township's overall economic development. By working together, residents and authorities must ensure a smooth and successful completion of this important project.
